# FOOD PACKAGING

## Dressings, sauces and syrups

Innovative, reliable and responsive solutions. Only from Mold-Rite.

Dressings, sauces, syrups and condiments continue to grab consumer attention as creativity in the kitchen surges. Consumer expectations have also influenced the evolution of new formulations from tropical oils and non-GMO to gluten free and unique flavor combinations. As these trends evolve, packaging plays an even greater role in helping these products stand out on the shelf. Choosing the right packaging can help your dressings, sauces, syrups and condiments attract consumer attention on grocery store shelves. Trust the packaging experts at Mold-Rite Plastics to help you create a package that will grow your business in this expanding market.

### Food Packaging Trends for dressings, sauces, syrups and condiments

**Simplicity, Convenience and Ease of Use.** Packaging that is appropriately sized, easy to grip and hold, open and close is the difference between a frustrated consumer, and a return customer.

**Labeling Transparency.** Consumers are connecting food with the way they look and feel. Gluten-free, fat-free and all-natural are driving transparency regarding ingredients, as well as the story behind how a product is made.

**Designing for Digital.** The ways and number of places consumers shop today requires a new approach to shelf appeal. Eye-catching graphics, bold colors and packaging with billboard potential are becoming the norm in modern packaging.

### About Mold-Rite

A leading provider of packaging for more than 30 years, Mold-Rite Plastics has the jars and closures that deliver safety and compliance for the food industry. With a wide range of products to provide an optimal storage environment and shelf appeal, choose Mold-Rite as your trusted partner for your packaging needs.
