Date: February 8, 2020
Subject: MRP Supply Chain is Secure

Mold-Rite Plastics remains committed to our mission of being the most responsive, flexible, innovative and reliable supplier in the industry. We recognize that there may be concern regarding the potential impact the Wuhan China Coronavirus could have on our supply of raw materials. Please be assured that Mold-Rite Plastics' supply of raw materials is secure. There are not any components of the resin or liner that are solely sourced from China. Additionally, our primary colorant supplier has indicated that they do not foresee any issues at this time.

Mold-Rite Plastics will continue to monitor the situation and work closely with our suppliers to ensure the reliable availability of our raw materials during this developing health concern.

We understand that any situation affecting global health can also lead to increased demand for closures including child resistant closures for over the counter medicines, Nutraceutical closures for preventive supplements and disc top closures for hand sanitizers. Please be assured that we are prepared with available capacity and in stock products to help meet any increased demand that may arise in support of efforts to combat the spread of this illness.

Continue to correspond with your Mold-Rite Plastics Inside Sales Representative for the most current information.

Sincerely,

Aaron Schroeder
