## **CORONAVIRUS/COVID-19 Statement**

Mold-Rite Plastics is taking the threat of the Coronavirus (COVID-19) very seriously. We understand the importance of protecting our customers and employees and are following our same standard protocols around supply chain security, business continuity and emergency plans already in place to address potential widespread outbreaks.

At this time, our supply chain remains unaffected and we expect this to continue. MRP's raw materials are sourced and produced exclusively within North America. Since the COVID-19 virus' initial outbreak, Mold-Rite Plastics has been and will continue to monitor the situation and work closely with our suppliers to ensure the reliable availability of our raw materials. While MRP suppliers have indicated they do not foresee any disruptions based on current knowledge and facts, like Mold-Rite, many suppliers are implementing preventive and precautionary plans that include reinforcing GMPs with employees, restricted travel, and employee education. Further, MRP continues to ensure it's higher than industry standard raw material stocking levels are maintained providing additional supply assurance.

Our current FSSC 22000 Food Safety Certification already requires critical measures to prevent the spread of disease, but in addition, we are implementing the following to enhance the health and safety of our employees:

- Employee education
  - o Prevention through proper hand hygiene, cough and sneeze etiquette
  - o Isolation at the first sign of illness
  - o Encouragement to stay home if symptoms surface
  - o Availability and awareness of proper protective equipment (face masks, gloves, sanitizer, etc.)
- Additional sanitation and disinfecting across all of our facilities
- Controlling travel as feasible and avoiding unnecessary trips that could be covered with a conference call

We understand that any situation affecting global health can lead to increased demand for closures to support items such as over the counter medicines, preventive supplements and hand sanitizers. By taking these steps to ensure the security of our raw materials supply and the safety and well-being of our employees, Mold-Rite Plastics remains positioned to continue to provide the most responsive, flexible, innovative and reliable service you have come to expect.

We will continue to closely monitor this situation and encourage you to correspond with your Mold-Rite Plastics Inside Sales Representative should you have any questions or require additional information.
